RELEVENT PROJECTS

React THREADS Clone

- This is a Clone of well-known application, THREADS.NET.
- Built using the MERN (MongoDB, Express.js, React.js, Node.js) tech stack.
- Also utilized React-query, custorm useHooks, Redux-toolkit for better state management and Authentication & Authorization with JWT
- Socket.io, webhooks for real-time communication, and Chakra UI for the user responsive interface.
- It offers various features including authentication, post creation, deletion, liking/unliking posts, commenting, following/unfollowing users.
- Chakra Ui for responsive design and dark/light mode.
- Additionally, it includes a chat application with image support, seen/unseen status for messages, real-time typing indicator and notification sounds.

React INSTAGRAM Clone

- The Instagram Clone project seeks to replicate the key features of the original Instagram application, allowing users to explore and interact with content in a familiar environment.
- This project is built using React.js for dynamic frontend development, Tailwind CSS for responsive styling, and Firebase as the backend.
- It offers various features including authentication, post creation, deletion, liking/unliking posts, commenting, following/unfollowing users and a responsive design.

React PIZZA App

- The MERN React Pizza E-Commerce Web App is a full-stack application designed to facilitate online pizza ordering and delivery
- The app is built using the MERN stack (MongoDB, Express.js, React.js, Node.js), Redux for state management
- Also Tailwind CSS for responsive styling, and integrates the Geolocation API for location-based services.

WORK EXPERIENCE

Core PHP Developer

MOBIT SOLUTIONS | LAHORE   JULY 2023 - SEP 2023

- Proficiently utilized Core PHP and JAVASCRIPT skills to debug, fix APIs, and implement new functionalities, enhancing web application performance.
- Maintained and optimized MySQL databases, ensuring data integrity and efficient data retrieval.
- Resolved critical issues, contributing to project success and skill development.
- Collaborated with the QA team to identify and resolve reported issues

MERN Stack Web Developer

FIVERR | REMOTE   2022 - PRESENT

- Created solutions for web apps using REACT and NEXT.JS, Redux-toolkit, Zustand making web experiences that are engaging and interactive.
- Developed dynamic and responsive websites, integrating both front-end and back-end functionalities to meet client requirements.
- Developed web apps that matched business goals and what clients needed, ensuring it was effective and lasting.
- Designed organized ways to test the system, finding and fixing issues to make it work even better.
